Microservices Architect | AI Engineer

connect.with.apk@gmail.com

Mettur Dam, Salem, TamilNadu

TECHNICAL SKILLS

Programming Knowledge:	Java, Python, jbase
Databases:	MySQL, Oracle, PostgreSQL
Cloud Platforms:	Azure, Amazon Web Services, Open Shift
Framework:	Spring Boot, Hibernate, LangChain, Streamlit, Gradio
Streaming Platform:	Kafka, IBM MQ
Deployment Stacks:	J2EE, Docker, Kubernetes, AutoSys, UDeploy
Web Technologies:	HTML, CSS, JavaScript, JSP
Development Tools:	Ollama, Copilot, Devin, Git, Maven, Gradle, IntelliJ, Postman, Bitbucket, Swagger, Transact T24

EXPERIENCE

App Developer Programmer Analyst 2, Citicorp Services India Pvt. Ltd. **Aug 2025 – Present**

- Implementing technical improvements and modernizing legacy applications within the Money Market (MM) product under Quantum Foreign Exchange and Local Markets (QFXLM) Business line to enhance system performance and reliability.
- Automated the QFXLM Data Migration activity which is time consuming and requires more manual effort.

Product Engineer – Micro Services, Temenos India Pvt. Ltd. **Oct 2022 – Aug 2025**

- Orchestrated collaborative sessions with key stakeholders from leading banks to decipher intricate requirements for a cutting-edge fintech platform; leveraged insights to enhance product functionality and cater to specific industry needs
- Awarded for upgrading micro services from JDK 8 to JDK 11 which was a road block for Annual Maintenance Release
- Developed and optimized the Temenos Party Microservice to serve as the primary master data repository for individual details, achieving a 30% reduction in data access latency

Associate Product Engineer - Micro Services, Temenos India Pvt. Ltd. **Apr 2022 - Sept 2022**

- Directed the implementation of FAMS to Go for the Finnish and Denmark markets, resulting in a 25% boost in active users.
- Enabled Funds Authorisation Microservice Standalone Capabilities to work without the support of Transact/T24
- Acknowledged by the Delivery Manager for effectively executing a time-sensitive solution that circumvented potential penalties and garnered additional revenue from the client, surpassing revenue projections by 20%

Software Engineer - Micro Services, Temenos India Pvt. Ltd. **Feb 2021 - Apr 2022**

- Implemented Funds Authorisation Micro service's LSM or Limited Service Mode solution which enables the bank to prepare for such a planned downtime and continue to provide services to their customers while Transact/T24 is not fully available.

PROJECT WORKS

Captured Live Wikimedia Data change – Using Kafka Clients, captured live data and stored in Open Search Database

Design of Funds Authorization Micro Service - Implemented Limited Service Mode with Zero Downtime

Creator of Game Development World Champion Finalist game (I++) - Created using Android Studio & deployed in play store

EDUCATION

PSG Institute of Technology and Applied Research, Coimbatore.

Aug 2017 - April 2021

Bachelor of Computer Science Engineering GPA: 8.6/10
